

Setting up WiFi using Vodafone Mobile Broadband Stick on the Vodafone Broadband Router

1. Remove the lid on the back of the terminal and insert the USB stick into the slot as shown above.

2. Connect the power supply on the Broadband Router. Check that WiFi and 3G mobile internet access lights are showing red.

3. To connect a wireless device ensure WiFi is turned on the device you want to connect to the network. Scan for available WiFi networks.

4. Select Vodafone_XXXX from the list of networks that appears.

5. If you are asked for a wireless key, you'll find it on the rear panel of the modem

6. To manage the router settings you can log in to the configuration page as follows:

- Launch the Internet Explorer and enter <http://192.168.1.1> (the default LAN IP address of the router) in the address bar. Then press Enter to display the login window.
- Enter the user name (vodafone by default) and password (vodafone by default).

7. Further information on connecting how to set up a wireless connection between various popular computer operating systems and the router wireless network can be found <http://forum.vodafone.ie/index.php?/topic/2232-set-up-a-wireless-connection-with-a-vodafone-hg556a-wireless-modem/>
